-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6, 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by the admitted prior art as shown in Fig. 2.

The admitted prior art discloses an apparatus for fixing a reflection mirror for a laser scanning unit, comprising a reflection mirror (Fig. 2, 6), a frame receiving and supporting the reflection mirror (1), at least one fixing piece integrally formed with a bottom surface of the frame and each having a connection surface which is slanted at a predetermined angle so as to be in tight contact with a reflection surface of the reflection mirror (8), at least one support block supporting a portion of a reverse surface of the reflection mirror (a hump on 9 and 9), wherein the at least one support block is shaped in a triangle having a predetermined slant surface for contacting the portion of the reverse surface of the reflection mirror (see shape of the hump on 9).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art.

The admitted prior art discloses the claimed invention as set forth above except that the at least one support block is integrally formed with the bottom surface of frame. It would have been obvious to one of ordinary skill in the art to make these two elements to be integral for the purpose of tightly securing the mirror to the housing.

Allowable Subject Matter

5. Claims 1-3 and 5 are allowed.

6. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2872

7. The following is a statement of reasons for the indication of allowable subject matter: claims are allowable at least for the reason that the prior art does not teach or reasonably suggest at least one clamp for clamping the at least one fixing piece and the reflecting mirror together in order to tightly contact the reflecting mirror and the connection surface of the at least one fixing piece as set forth in the claimed combination.

Response to Arguments

8. Applicant's arguments with respect to claims 6-8, 10 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EUNCHA P. CHERRY whose telephone number is 571-272-2310. The examiner can normally be reached on M-F 6:30-4:00, alternate Fridays off.
